

Novatube

Horticultural Lateral Tube

NOVATUBE is a low density polyethylene pipe designed specifically for use in low pressure horticultural and viticultural irrigation lateral applications. Novatube is manufactured from pre-compounded LDPE, ensuring consistent carbon black dispersion to maximise Novatube's ability to withstand UV degradation.

Features and Benefits

Superior 5 bar pressure rating

Delivers 61% higher than industry standard lateral pressure rating for added system security.

Performance tested in our NATA registered laboratory

Means consistent pipe dimensions and performance.

Compatible with commonly available fittings systems

Added versatility for system design and installation.

Manufactured from fully pre-compounded black LDPE

Consistent PE compound properties for additional resistance to weathering.

Wide choice of flow performance

Available in 13mm, 16mm, 19mm and 25mm diameters.

Product Range

Product Code	Mean Bore ID (mm)	Pipe Size OD (mm)	Pressure Rating Bar	Coil Length
350.13.100	13.1	15.3	5	100
350.13.400	13.1	15.3	5	400
350.16.100	16.3	18.9	5	100
350.16.400	16.3	18.9	5	400
350.19.100	19.0	22.0	5	100
350.19.300	19.0	22.0	5	300
350.25.100	24.9	28.7	5	100
350.25.200	24.9	28.7	5	200
