

rural black

HPPE PRESSURE PIPE

340 Series

RURAL BLACK is a tough, long life metric pipe made from PE100 high performance polyethylene (HPPE). A popular material for urban and rural water supplies, HPPE is lightweight, strong and flexible making it ideal for a variety of applications. In combination with the technically superior PLASSON range of fittings it offers a reliable, efficient and economical system which maintains a consistent pressure rating across a range of diameters.

Features and Benefits

Reliable Performance

Maintains a constant 12.5 bar pressure rating across the entire range of pipe diameters.

Fittings Compatibility

Connects easily to other pipe systems through the use of BSP threaded fittings or a PLASSON Universal Coupling (code 2512).

Comprehensive

RURAL BLACK is available in three different coil lengths (50, 100 and 200 metres) 32mm, 40mm & 63mm RURAL BLACK is also available in 6-metre lengths for straight pipe connections to tanks & troughs.

Complete Solution

When used with PLASSON Compression fittings, RURAL BLACK offers a complete, cost efficient and effective system for farm water distribution.

Durable

RURAL BLACK is made from tough, kink resistant high performance polyethylene.

Bloat Treatments

RURAL BLACK can be used with in line bloat dispensing systems.

High Quality

Pipe is manufactured and tested to AS/NZS 4130:1997 - "PE Pipes for Pressure Applications."
